Objective

I am a front-end developer building web applications. I specialize in JavaScript (React), Express, MongoDB, Strong collaboration, and problem-solving. I am looking forward to joining a well-reputed company as a front-end developer where I can grow with the best services to the company with ever new challenges.

Skills

Expertise : JavaScript, React, React Bootstrap, React Router, HTML5, CSS3

Comfortable : Node.js, Express.js, MongoDB, JSON, REST API

Familiar : Tailwind CSS, Material UI

Tools : Git, GitHub, VS Code, Dev tool, Firebase, Heroku, Figma

Projects

❖ Car Zone Website

Features:

- Using this website, a user can buy a different car, cancel the booking and track the status of the booking.
- Users can add a review, and these are shown on the home page.
- Admin can add/delete products, change order status, see all orders.

Used: React.js, React-Bootstraps, Material UI, React Router, Node.js, Express.js, MongoDB, Firebase Authentication.

Live: <https://car-zone-b7c49.web.app/>

Client: <https://github.com/Akther2034165/CarZone>

Server: https://github.com/Akther2034165/CarZone_Server

❖ Travel Club Website

Features:

- This is single page web application. Fully responsive on Mobile & Desktop.
- Users can book tour spots and see their booking history & cancel their bookings.
- Anyone can add products, see the order booking list.

Used: React.js, React-Bootstrap, React Router, Node.js, Express.js, MongoDB, Firebase Authentication

Live: <https://travel-club-efbfb.web.app/>

Client: https://github.com/Akther2034165/Travel_Club

Server: https://github.com/Akther2034165/Travel_Club_Server

❖ Cure Point Health Care Website

Features:

- This is a medical-related website.
- Users can see service details and get an appointment.
- There's a doctor's page where all the available doctors are displayed.

Used: React.js, React Router, React-Bootstrap, Firebase Authentication

Live: <https://cure-point-health-care.web.app/>

Code: https://github.com/Akther2034165/cure_point_health_care
